

ClearShield™

If life were perfect, you'd never have to "do windows" again, and all the glass in your home would sparkle in a pristine state of cleanliness.

However... In the real world, where perfection rarely meets reality, glistening, pristine glass quickly becomes a cleaning challenge with permanent spots, stains and scale build-up. While we can't help with the windows, we can offer a solution for your shower door glass!

ClearShield™ is a unique polymeric resin coating applied to the glass surface which seals the surface and helps prevent chemical corrosion leading to spots, stains and scale build-up. Glass treated with ClearShield™ is easier to clean, resulting in glass that maintains its "like new" appeal with less cleaning effort.

Easier to clean - - less time and effort required to keep glass at its best!

In-stock

ClearShield™ is a unique polymeric resin that protects glass like "non-stick" cookware. It is an invisible protective barrier against harmful organic and inorganic contaminants. As a result, ClearShield keeps your shower enclosure cleaner, easier to maintain and looking like new. By reducing bacteria growth, ClearShield promotes a more hygienic shower environment.

Glass protected with ClearShield™

Glass protected with ClearShield™

Unprotected glass after exposure to typical shower conditions shows white patches of limescale.

Unprotected Glass

ClearShield After-Care

Recommended cleaning product for ClearShield™ Glass.
