

International Bath Corp. announces design improvements on its line of Air-Jet Tubs

All air-jet tubs with ports on the bottom of tub have been discontinued. Air-jet tubs will now be manufactured with the ports relocated to the lower sides of the tub. See photo and diagram below.

All air-jet tubs will now come standard with 24 air-jets (8 additional).

Polished chrome air-jets are standard.

White, bone, biscuit, oil rubbed bronze, polished brass, brushed nickel air-jets are available for an additional \$75.00 per tub.

5 - 7 day lead time to manufacture

All air-jet tubs will still come with level bottom.

24 strategically placed air-jets wrap your body with a gentle warm air bubble massage.

Each air-jet has a built-in valve to prevent back flow in the air passage. They remain clean as no contaminated water can enter them and stagnate there.

MAGNA LUXURY SERIES
ACRYLIC WHIRLPOOL TUB
WITH NEW AIR-JET PLACEMENT
