MODERN DESIGN
REDEFINED

MEZZO

You've never experienced modern design like this. Clean. Discreet. Luxurious. We spared nothing, to give you everything. It's modern design, redefined.

DETAILS MATTER

In clean modern design, it's all about the details. No gaps. Clean finishing. And quality. Every corner, every edge and every element of the MEZZO is all about perfection.

ELEVATE THE SENSES

Flames, lights, reflections and warmth combine to stimulate the senses. Flames spread across an illuminated bed of crushed glass. And a black glass interior adds depth and intensity to the fire. We dare you to take your eyes off of it.

DEFINE YOUR DESIGN

Your style, is yours. Express it by mixing and matching fronts, finishes and interior options to create a MEZZO uniquely yours.

MEZZO TECHNOLOGIES

INTELLIFIRE PLUS IGNITION SYSTEM

An advanced intermittent pilot ignition system with memory settings and a programmable wireless RC300 remote control. IPI Plus constantly monitors ignition, ensures safe functioning and conserves up to \$10/month in energy costs.

DIRECT VENT TECHNOLOGY

Direct Vent fireplaces remove 100% of combustion exhaust and odors outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

CLEAR LED LIGHTING TECHNOLOGY

Superior performance and extended efficiency. This technology provides high-contrast, brilliant lighting to accentuate the flames. Can be used as mood lighting, with or without the flames.

FADE-RESISTANT BLACK GLASS INTERIOR

A clean modern look never gets dull. Just like this black glass interior. It's hot. And looks that way, too. For the life of your MEZZO.

HEAT ZONE TECHNOLOGY

Draw heat from the MEZZO into another room of the home, up to 20 feet away. When a heat zone kit is run continuously, it will redirect up to 25% of the fireplace's heat to another area, thus reducing wall temperatures above the fireplace. Two heat zones run continuously will redirect up to 50% of the fireplace's heat.

Dimensions are in inches and millimeters. Product information is not complete and is subject to change without notice. Product installation must adhere strictly to instructions shipped with product. We recommend measuring individual units at installation. Assumes the use of 1/2" sheetrock. NOTE: Combustible material should not cover the face. Make sure you do NOT cover the decorative door opening.

Refer to installation manual for detailed specifications on installing this product. Heat & Glo® reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Actual product appearance, including flame, may differ from product images.

U.S. EFFICIENCIES

Steady State - Since most homeowners use their fireplaces for an extended time while they are in the room, Steady State measures how efficiently your fireplace converts fuel to heat once it is warmed up and running in a “steady state”.

AFUE - AFUE rating is more typically used with appliances, like your furnace, that continually cycle on and off to maintain a constant temperature.
