

# WOOD CARE & MAINTENANCE

## Here are a few basic tips for wood countertop cleaning and care:

- Wash your wood countertops with mild soap and water, then rinse. Disinfect with a vinegar/water solution as necessary. Re-oil every 3-5 years, depending on the level of use.
- Use a hot pad or trivet under very hot pots or pans when placing them on the countertops. Use a coaster or placemat for drinks and plates to prevent accidental spills from getting on the wood countertops.
- Using a knife on your countertops can damage the countertop. Always use a cutting board on your wood countertops.
- Touch-ups can be done at any time. Light sanding will remove most marks from the countertop but may require the topcoat or oil to be re-applied.
